However, Momentum Collective Investments (RF) (Pty) Ltd does not accept any responsibility for any claim, damages, loss or expense, howsoever arising, out of or in connection with the information in this document, whether by a client, investor or intermediary. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of Momentum Collective Investments (RF) (Pty) Ltd's product. Collective investment schemes in securities are generally medium- to long-term investments. The value of participatory interests or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. The manager does not provide any guarantee, either with respect to the capital or the return of a portfolio.

The manager has the right to close certain portfolios to new investors, in order to manage it more efficiently, in accordance with its mandate. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of participatory interests apply to these portfolios and are subject to different fees and charges. Individual investor returns may differ as a result of different class fees, initial or ongoing advisory fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. A schedule of fees, charges and maximum commissions is available on request from the manager or is available on the website (momentum.co.za/collectiveinvestments). Forward pricing is used. Associates of the manager may be invested within certain portfolios and the details thereof are available from the manager. A money market portfolio is not a bank deposit account. The price of a participatory interest is a marked-to-market value. The total return to the investor is made up of interest received and any gain or loss made on any particular instrument, and in most cases the return will merely have the effect of increasing or decreasing the daily yield, but in the case of abnormal losses, it can have the effect of reducing the capital value of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressures, and in such circumstances a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. The Momentum Money Market Fund yield illustrated in our minimum disclosure documents and quoted daily in the press is the seven-day rolling effective yield. Bond and income yields quoted in the press are historical yields based on distributions and income accruals calculated monthly while those quoted in the Weekly Income Fund Yield Summary are current running yields calculated weekly.
