

Momentum GF Global Sustainable Equity Fund

The fund is a US Dollar denominated global equity portfolio giving you exposure to a diversified basket of developed market equities, and is suited to investors with a high-risk profile and a long-term investment horizon.

The fund is actively managed using a systematic multi-factor enhanced index approach to selecting stocks, aiming to deliver long term capital growth and outperformance against its benchmark, the MSCI World NR Index, over a rolling 3-year period.

The fund also integrates sustainable ESG (Environmental, Social and Corporate Governance) criteria into its stock selection and aims to have a better overall ESG rating and environmental footprint (lower carbon emissions, waste generation and water consumption) than its benchmark. The underlying equities are accessed through one of the pioneers in quantitative investment strategies and ESG integration, Robeco, an asset manager based in Rotterdam.

The Momentum GF Global Sustainable Equity Fund is managed by Momentum Global Investment Management (MGIM), our London office. MGIM was established in the UK in 1998, as a specialist global investment manager.

Investor profile

The fund's enhanced index approach combines the best of active and passive management resulting in lower fees than traditional actively managed equity funds but with higher return potential. The fund is therefore suitable for cost sensitive investors who want to generate long term capital growth by investing in a diversified Dollar denominated global equity fund that actively integrates ESG criteria in the stock selection. Investors should be able to tolerate the heightened levels of volatility associated with equity funds.

Fund risk profile

This portfolio invests in foreign securities which carries country specific risks, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

Investments in a foreign currency exposes you to foreign exchange risk.

Costs

Annual investment management fee of 0.3%.

The fund may have other variable costs. For the most up-to-date costs, consult the latest minimum disclosure document.

Disclaimer

Collective investments are generally medium to long-term investments. The value of units may go down as well as up and past performance is not necessarily a guide to the future. Collective investments are traded at ruling prices. Commission and incentives may be paid and, if so, would be included in the overall costs. All performance is calculated on a total return basis, after deduction of all fees and commissions and in US dollar terms. The Fund invests in other collective investments, which levy their own charges. Higher risk investments include, but are not limited to, investments in smaller companies, even in developed markets, investments in emerging markets or single country debt or equity funds and investments in high yield or non-investment grade debt. Foreign securities may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Investment in the Fund may not be suitable for all investors. Investors should obtain advice from their financial adviser before proceeding with an investment.
